Haywood County **Ruiz Report** May, 2025

# Dwell Realty Group

Understanding the local real estate market is one of the most important aspects of buying or selling a home. Whether you're debating how much to offer or if you should accept an offer you've received, market knowledge is power.

Making an informed decision involves staying current with both the "macro-market" as well as the "micro-market" for your unique situation. As top real estate agents one of the most important things we can do for our clients is to empower them with that same information.

With that in mind we have commissioned this month's Ruiz Report to make sure you're as up to date as possible with current local market conditions, using accurate data directly from the MLS. **Clicking any of the links on slide 4 will take you directly to properties on our website.**

We are always available to answer any questions. Feel free to call us at (828)210-3898 or send us an email at [info@dwelavl.com](mailto:info@dwelavl.com).

Sincerely,  
Dwell Realty Group

D W E L L

## Learn the lingo

**Active Listings:** This is the total number of listings that were for sale *at any given point during the month*.

**Under Contract:** This is the total **number** of listings that accepted an offer to purchase *during the month*.

**Under Contract (%):** This is the "Under Contract" column represented as a **percentage** of the county.

**Pending Ratio:** This ratio is calculated using a **snapshot** taken at 11:59pm on the last day of the month. It used to show a price range's competitiveness by comparing the number of listings under contract to the total number of listings on the market at the time the snapshot was taken (active + under contract).

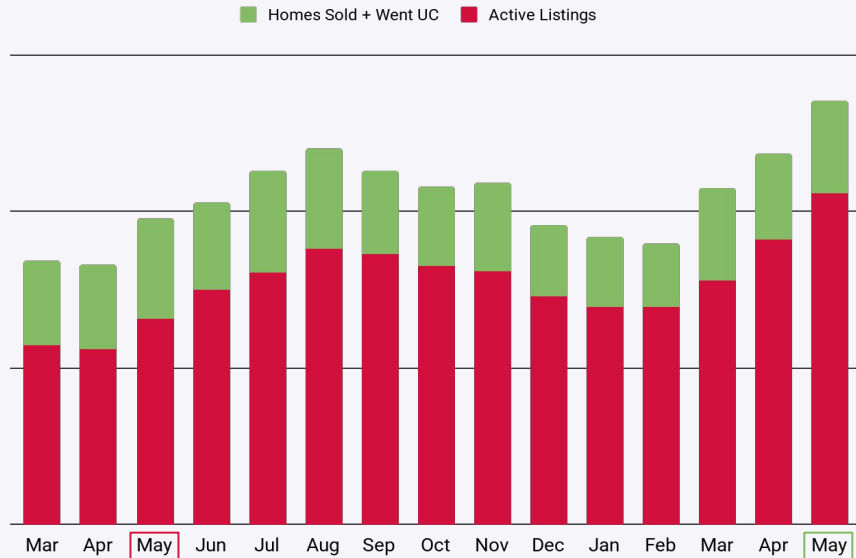

**Months of inventory** represents how long it would take to deplete the current inventory assuming no new homes are put on the market. It's commonly used to determine the health of a particular market.

**Between 0-4 months of inventory is considered a seller's market** because supply is relatively low, which means that sellers have more control to set terms or raise prices. **5-7 months signals a balanced market** - there is a healthy mix of buyers and sellers. **8 or more months of inventory indicates a buyer's market**, which means buyers have more negotiating power.

Seller's Market

Buyer's Market

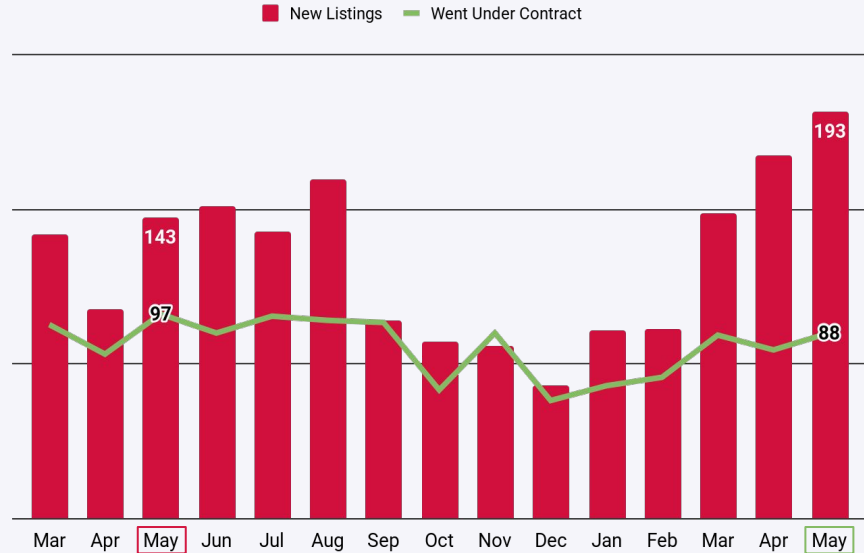

# Volume & Activity

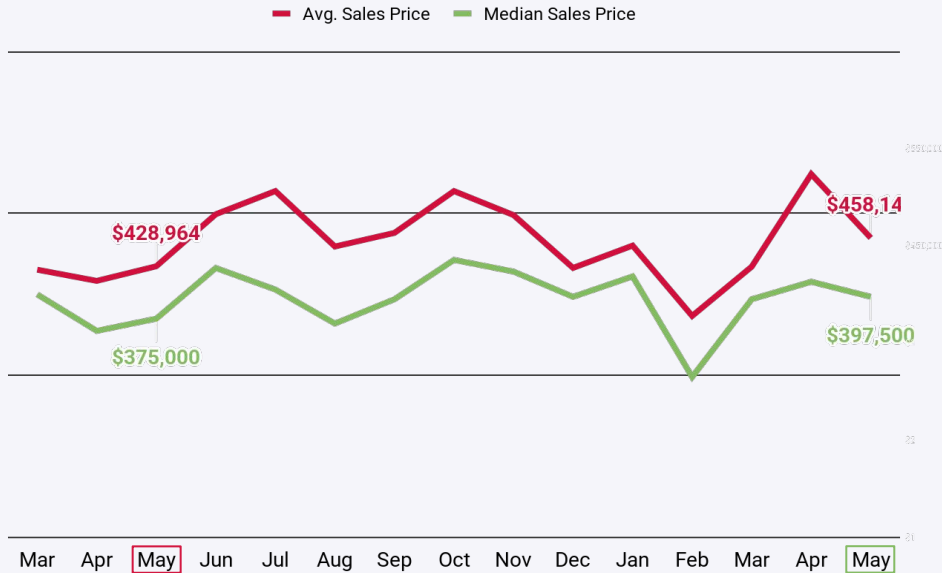

- The number of active listings *increased* by 17% in May. **Total Active listings, the number of properties listed for sale at any point during the month, was up 61% compared to last year.**
- Total homes under contract increased 10% from last month, but **Haywood had 9% less homes under contract in May than it did this time last year.**
- Overall volume was up 16% from last month and up 47% from this time last year.

# Listings & Closings

- **New listings increased 12% from last month**, and were up 35% from last May's numbers.
- **10% more homes went under contract**, but Haywood had less homes going under contract than this month last year, down 9%.
- **Pro Tip:** keeping an eye on the difference between homes added to the market (new listings) and those taken off (by going under contract) is the best way to gauge supply & demand!

# Home Prices

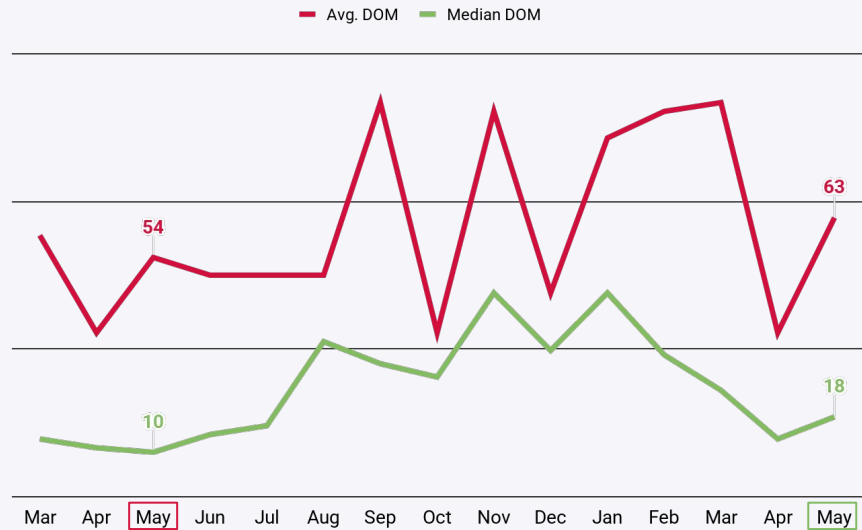

The **median price** is the “middle price,” meaning half of the homes sold during the month were cheaper and half were more expensive than the median. The **average price** is the total sales divided by number of sales.

- The average home price in Haywood County decreased 13%, but homes were valued 7% higher compared to last May.
- The positive home value appreciation trend seems to be holding despite interest rates.  
**Pro Tip:** monthly price fluctuations are less indicative than annual trends for understanding market shifts!
- The consistently higher average vs. median home price tells us that **Haywood’s high-end market is strong**, with higher priced homes raising the average for the whole market.

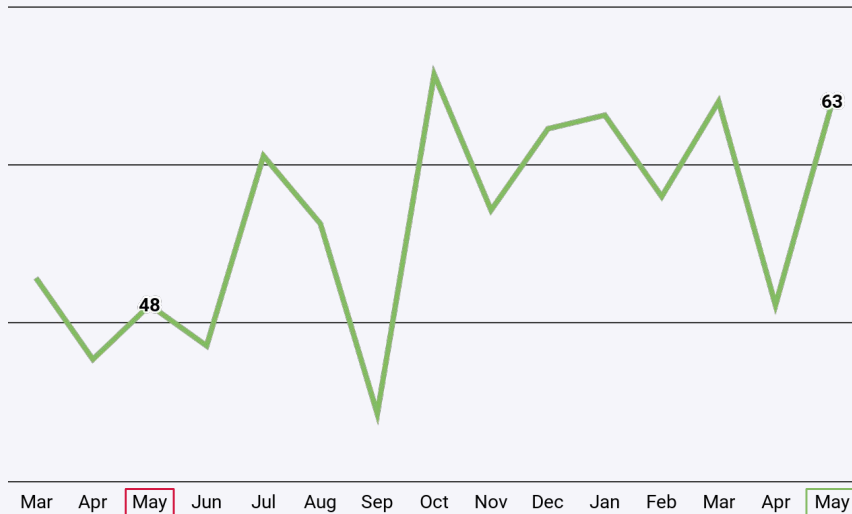

# Days On Market

- On average, homes took 26-days longer to go under contract than they did in April, and the median days it took to sign a purchase contract was 18-days (!!!).
- Homes valued up to \$99k sold fastest in May, with a median 6-days on the market, followed by homes in the \$700-999k range, which took a median of 7-days.
- Homes in Haywood are selling quickly due to a combination of extremely low inventory and high demand for homes.

The **median DOM** is the “middle DOM,” meaning half of the homes during the month went UC faster and half took longer than the median. The **average DOM** is the total DOM divided by number of sales.

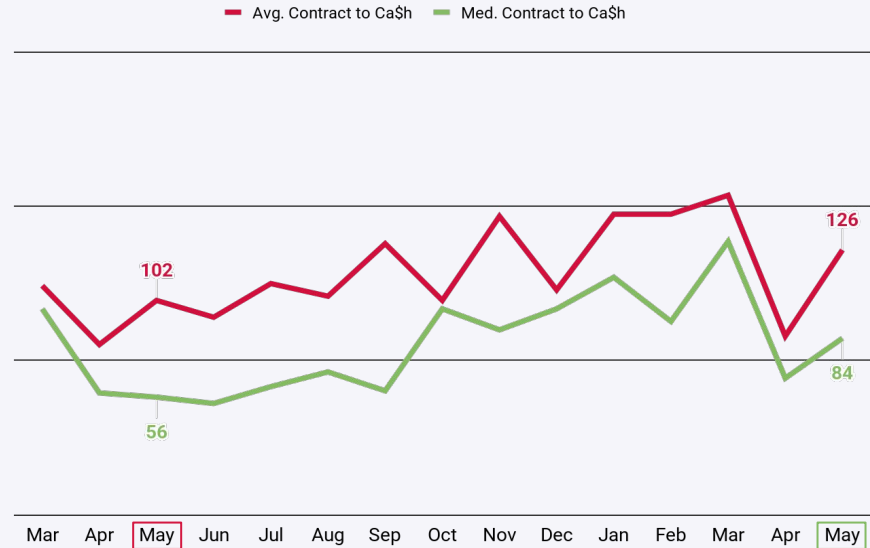

# Contract To Close

- **Contract to close time took an average of 15-days more compared to last month, which was 15-days slower compared to last May.**
- **Homes valued between \$700k-999k took among the longest to close.** May closings data put that segment at around 120-days, on average.
- **Homes valued between \$175k-199k closed fastest,** closing in ~22-days, on average.

# Contract To Ca\$h

- **Sellers got paid an average of 41-days slower** after listing their homes according to May sales data, and **24-days slower than May., 2023.**
- This overall increase was a due to increases in both time spent during the contract to close process as well as time spent on the market (DOM).
- Homes valued **valued between \$150k-174k sold fastest**, averaging 33-days, **followed by the valued up to \$99k price range** which took 41-days, on average.

# Methodology

Data for this report was pulled from Canopy MLS for Single Family and Condo/Townhouse properties on June 3rd, 2025. Realtors are required to update their transactions on the MLS within 48hrs, so while most records for the month should have been accounted for, any updates that occurred after the report was pulled will not have made the cut. This should not have a material effect on the data given the overall volume of transactions.

Please send me an [e-mail](#) if you have any comments, questions, requests, or corrections.

See below for some relevant formulas.

$$\text{Months Inventory} = \frac{\text{Active Listings This Month}}{12\text{-Month Pending Homes Average}} \quad \text{Pending} = \frac{\text{Under Contract End Of Month}}{\text{Active End Of Month}}$$
